

Family members visitation

According to the regulations of the Correction Department of the Ministry of Justice, the prison allows people who are registered to come and visit their family members at fixed times monthly. In December, there were six persons who registered to visit their family members; the Guard and Control Section arranged the whole process for the visitors to know every innovation and life management facilities at the prison.

The family members are very grateful for the major policies made by the prison in helping inmates to look for jobs and promoting health care services for them. They also appreciated what the Correction Department has done for all the inmates, like paying more attention to their medical and health care in prison, and their reintegration into society after incarceration, etc. Through this visit, family members changed their stereotype towards prison, and were informed that through the environmental transformation, humane management, humane discipline and transparency, etc., the inmates can feel unperturbed in the prison, be rehabilitated after finishing their sentences, accepted by society and embraced by their families.

We appoint a person specially assigned for the visitation.

The narrator explains how the institution operates.
